IMPORTANT INFORMATION

Product information contained in this leaflet is correct at the time of printing however is subject to change without notice. Some photos featured in this brochure are artist's impressions of how Shingle and Shaped Terracotta Boral roof tiles will look on a roof. These images are computer generated. Please ensure you view a tile display before making a final decision. Colours shown are indicative only and should not be used for final selection. Colours are subject to change without notice. Check print date prior to product selection. Roof tile colours may vary in shades throughout the manufacturing process therefore it is important that roof tiles are blended consistently across the roof. Boral Roofing will replace any roof tile which fails the

Australian Standard 2049 roof tiles. Please ask for a copy of the Boral Roofing 50 year guarantee before making your purchase. During transportation and installation small blemishes such as scuffing and chip marks may occur. These are not considered a production fault and will not detract from the performance of the roof tile. © Copyright Boral Montoro Pty Limited – all rights reserved 2006™ Terracotta Shingle is a trademark of Boral Montoro Pty Limited.™ Imagine the possibilities is a trademark of Boral Montoro Pty Limited.™ Accent is a trademark of Boral Montoro Pty Limited. shingle & shaped terracotta

Naturally at home on every home

The natural beauty of terracotta

Discover the purity of natural clay. Impeccably crafted for strength and resilience, terracotta roof tiles exude a character and quality that cannot be replicated.

Now terracotta meets fresh new colour in this latest collection from Boral. With no other roofing material comparable to the colourfast properties of terracotta, it's the ideal material to deliver on today's muted neutral tones and matt finishes.

Each shade conjures a different look – a style that adds personality and ambience to an extensive range of abodes. With a colour palette created to suit every house style, there's a myriad of options across architectural design from rural or coastal environments to compact urban dwellings.

Choose from the striking slim profile of the flat shingle or the timeless curves of our shaped range, and feel at home with Boral terracotta roof tiles. Just imagine.

Why Terracotta?

Premium Quality:

Crafted from select natural clays that are kiln-fired to temperatures of 1100°C for exceptional character and strength that is virtually maintenance free.

Stunning Colour:

A vitreous ceramic coating protects each tile from harsh UV exposure for superior colour performance and smooth surface finish. Select from four finishes from matt through to gloss.

Design Freedom:

Only Boral Terracotta roof tiles can achieve a roof pitch as low as 15 degrees for the latest in contemporary roof design.

Exceptional Performance:

Salt-safe and frost resistant, each tile interlocks at the head and the sides to enhance weather-proofing in even extreme conditions and coastal areas. Just ask us for a copy of our 50-year guarantee.

See Boral's guide, Roofing Insights, for more benefits of choosing roof tiles.

Some photos featured in this brochure are artists impressions of how Boral Terracotta roof tiles will look on a roof. These images are computer generated. Please ensure a tile display is viewed prior to making a final product decision.

TERRACOTTA RANGE

Terracotta Shingle™

Contemporary design flexibility fuses with enduring quality in Boral's Terracotta Shingle™. Featuring a slim flat profile, the clean lines of Shingle tiles represent an understated appeal that adds value across diverse architectural styles.

Engineered for enhanced weatherproofing at a lower roof pitch, each tile features an increased spillway at the head to drain excess rainwater in the wet. This acts as an excellent weather barrier when things get stormy.

With its range of carefully selected colours, there's no longer a reason to compromise on material to achieve streamlined roofs of lasting beauty.

Shingle

Terracotta Shingles are individually kiln-fired and feature minimal natural variations that mean they are not uniformly flat. Each tile can vary up to 8mm across the horizontal plane and pallets should be blended across the roof to achieve a beautiful result of authentic character.

Accent™ Ridging

Shaped Terracotta

A long-serving perfect match with classically beautiful architecture, today the curved profiles of Boral's Shaped Terracotta tiles introduce much-desired texture and warmth to modern living.

Achieve an eye-catching balance with the latest flat wall finishes or accentuate your eye for tradition. Whatever your preference, the twin valley profile of each tile provides a natural watercourse for rain and creates a roofline of depth and distinction.

Express your individuality through alluring curves that are as protective as they are striking.

Did you know?

Roof tiles by Boral are

- ✓ Suitable for rainwater collection
- ✓ Great thermal performers due to their mass
- ✓ Low on embodied energy content
- ✓ Fire and wind resistant
- ✓ Better for sound insulation
- ✓ Built to last with proven durability
- ✓ Virtually maintenance free

accentuate your eye for style

Turn generic into standout and sharpen up your roofline with Accent™ Ridging, a low-line ridge system to enhance terracotta tiles.

Whether flat or shaped in tile profile, Accent™ Ridging seamlessly aligns ridge capping end-to-end in one smooth line without steps.

For the ultimate contemporary silhouette of clean lines and sleek simplicity, with all the benefits of terracotta.

All homes in this brochure feature a Boral Accent™ Ridge System. This option will incur additional costs.

Wild Choc

Imagine™
the possibilities

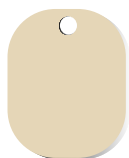

Wild Choc

Nothing provides depth to a natural colour scheme like the rich warm tone of chocolate. Complement with timber accents for a harmonious and inviting look.

Tile profile: Terracotta Shingle™

For bold combinations of striking contrast that are equally at home on larger stately residences and compact urban dwellings.

shingle

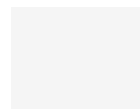

Eclipse

The colour of the night sky evokes a quiet strength that in our homes gives a sense of security and comfort.

Tile profile: Terracotta Shingle™

Soften the look with neutral tones from pale bones to mid-browns, along with whites of every hue.

Eclipse

Imagine™
the possibilities

Mineral

Imagine™ the possibilities

Mineral

Soft on the eye, at once the muted Mineral creates a sedate atmosphere that invites you to unwind.

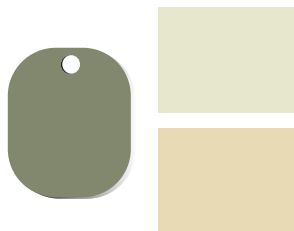

Tile profile: Terracotta Shingle™

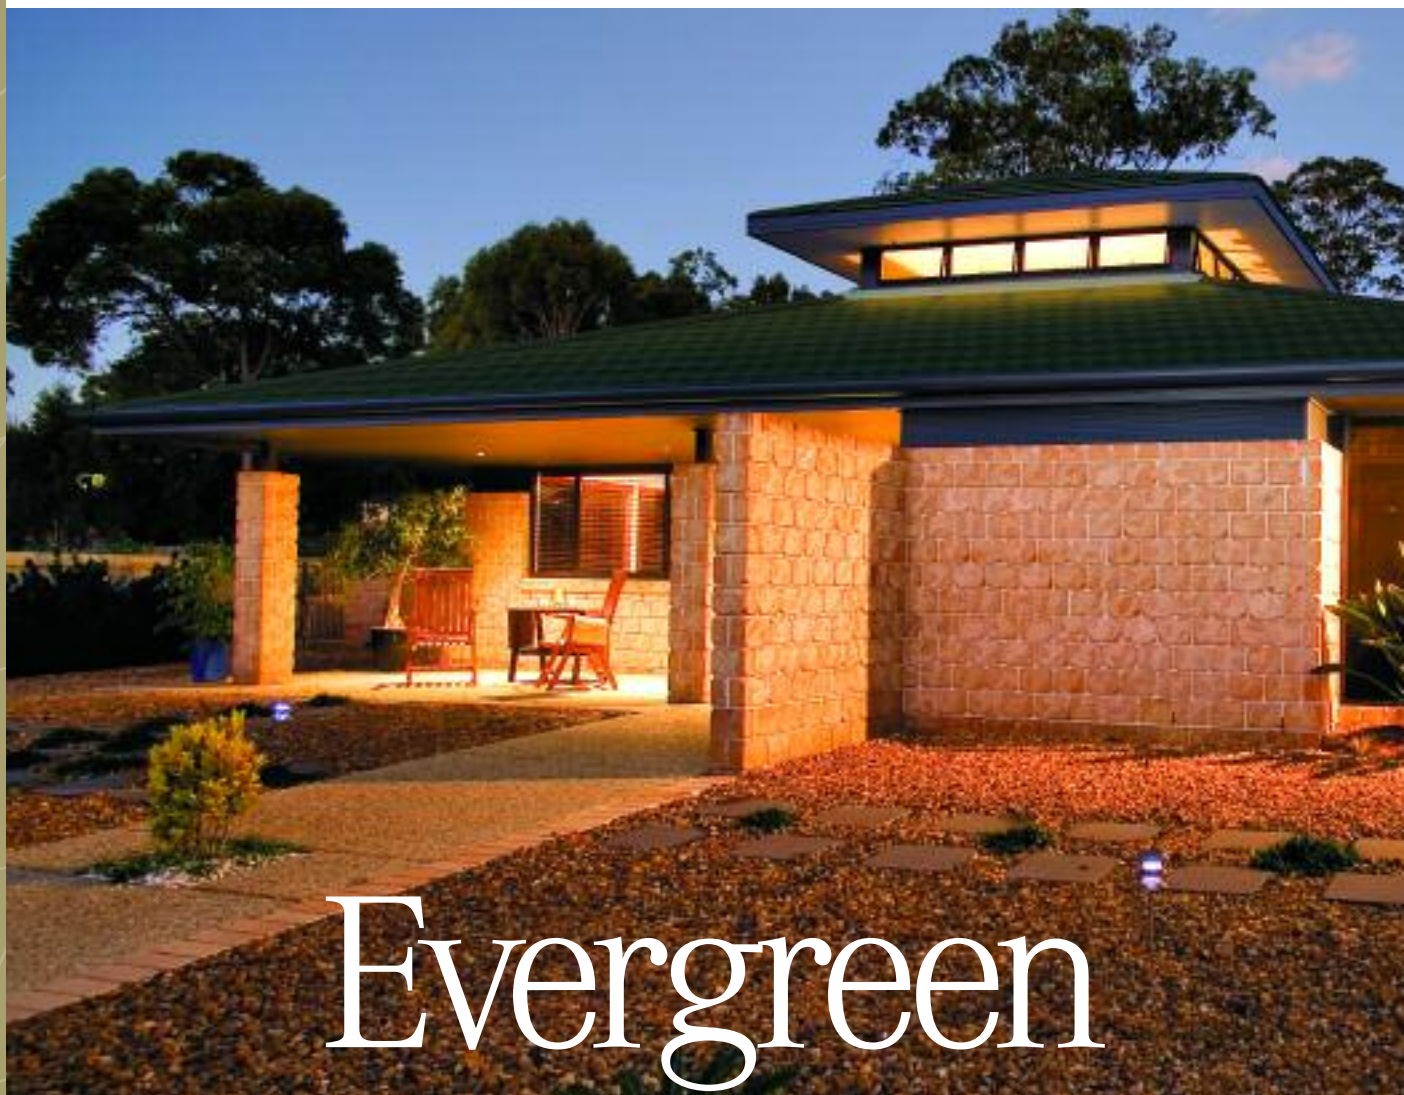

Harmonise this warmer shade of grey with a neutrals palette, from tonal mushroom complements to deeper contrasts.

shingle

Enhance with rich earthy trims and sunny honey-hued walls to lighten and brighten.

Evergreen

Imagine[™]
the possibilities

Evergreen

Infinitely adaptable, this smouldering shade of olive-grey sets a sophisticated silhouette against the Australian landscape.

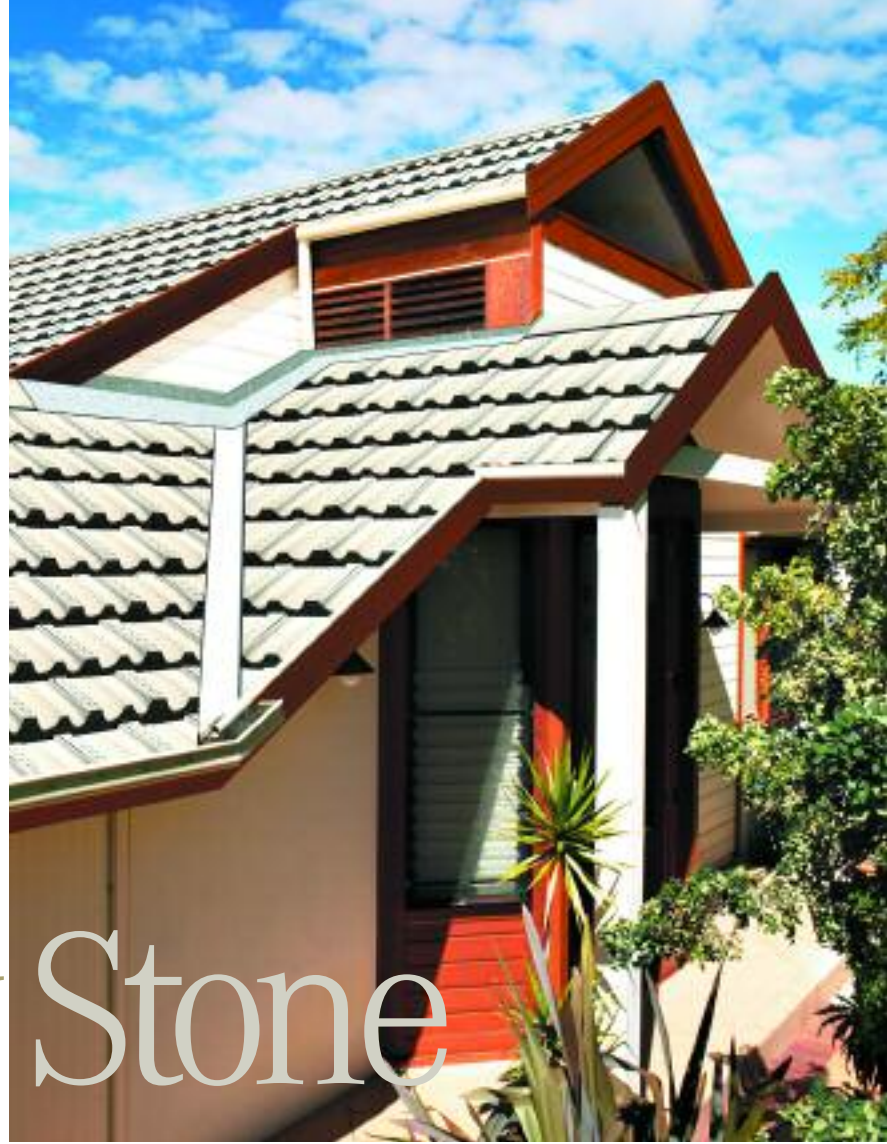

Tile profile: Terracotta Shingle[™]

Barley Stone

With a light look inspired by fields of grain, Barley Stone is a warm and modern take on stone that will stand the test of time.

Tile profile: French

Barley Stone

Imagine[™]
the possibilities

Anchor with trims of deep blues or greens or carry the neutral theme through tonal blends offset by crisp white walls.

shaped

Feldspar

Imagine™
the possibilities

Create understated serenity with white trimmings or try splashes of dusty red hues for a dash of warmth.

Feldspar

Give bright and breezy a grounded appeal. This cool shade of charcoal is enhanced by calming blue palettes that capture the intrinsic haziness of a coastal environment.

Tile profile: French

Savanna

Build a soothing familiar environment that is inspired by nature. Savanna reflects a rising interest in yellow influenced greens that are relaxed and fresh.

Tile profile: French

Subtle finishes of creams, greens and browns combine beautifully for a lasting impression.
