

# *Solar driven by design*

The Solé Power Tile™ blends seamlessly with US Tile's authentic clay roofing systems, to maintain premium aesthetics and roof integrity, while delivering the financial and environmental benefits of solar energy.

Solar roofing. Redefined.

# DESIGNER SOLAR ROOFING

**SOLÉ**  
POWER TILE™

## STUNNING AND SEAMLESS

The Solé Power Tile™ is designed to seamlessly integrate with US Tile's mission-style roof systems for homeowners who value beauty and longevity. The Solé Power Tile system preserves a sophisticated roofline for existing homes or new construction.

## COMPELLING RETURNS

A rooftop solar installation reduces your monthly electric utility bill while increasing your home's property value with decades of savings. Thousands of California homeowners are reaping the benefits of solar energy generation. Now clay roof owners can have a solar roof without compromising curb appeal or roof integrity.

"As a roofer, I feel confident offering my customers a solar solution that maintains the beauty and protection of clay tile. As a homeowner, I have jealous neighbors."

– Billy Thomas  
Owner, Roof Tile Specialty

## EXTRAORDINARY PERFORMANCE

The Solé Power Tile is built to last. The product is manufactured with high performance materials, recognized for long-term durability and energy generation in the harsh roofing environment. Glass-free and impact-resistant, the Solé Power Tile provides premium protection for your home. Unlike the installation of conventional solar panels, no mounting hardware or roof penetrations are required. Your roof's integrity is maintained.

*Solar with style*
